Investment Information

Investment Objective & Strategy

The Fund seeks to outperform the total return of the Russell 1000 Value Index.

LSV uses a proprietary quantitative investment model to choose primarily large and medium U.S. companies which are out-of-favor (undervalued) in the marketplace at the time of purchase and have shown near-term momentum. LSV believes that these out-of-favor securities will produce superior future returns if their future growth exceeds the market's low expectations.

Category Description: Large Value

Large-value portfolios invest primarily in big U.S. companies that are less expensive or growing more slowly than other large-cap stocks. Stocks in the top 70% of the capitalization of the U.S. equity market are defined as large cap. Value is defined based on low valuations (low price ratios and high dividend yields) and slow growth (low growth rates for earnings, sales, book value, and cash flow).

(Jan '13 - Mar '13)

Worst 3 Month Return

-9.36%
(Jul '15 - Sep '15)

Performance as of 09-30-15

The performance data quoted reflects past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower than the performance data quoted. For the most recent month end performance information, please call 1-800-922-9945, or visit rps.troweprice.com.
